Wood County Project Lifesaver Caregiver FAQ

Project Lifesaver is a Search and Rescue system using personalized radio transmitters and electronic tracking equipment. This transmitter bracelet is worn by individuals with cognitive disabilities, e.g. Alzheimer's, Autism, Down Syndrome, Traumatic Brain Injury, etc. who tend to wander and become confused. Only trained certified Deputies can use the equipment and the Wood County Sheriffs Office has 8 Deputies and 1 reserved Deputy certified at this time.

Cost of the Client:

- \$8.50 monthly maintenance fee for battery and wristband replacement (can be waived if client does not have the funds and if we have enough funds)

Client Eligibility:

- Transmitters will be placed with clients ONLY at the request of a legally responsible party
- Must have a cognitive disability, tendency to wander and a primary caregiver providing ongoing, daily hands on care
- Eligibility will be determined by the Project Lifesaver Eligibility Task Force

Caregiver Responsibilities:

- Caregiver must check the battery everyday and record on log
- Notify the Sheriffs Office immediately if the battery dies or if there is a problem with client wearing the bracelet or with the tester
- Notify 911 immediately if the client is missing

Is the Band Waterproof:

- No it is water resistant. Can be worn in bath, shower, pool, etc. Additional measures can be taken to increase water resistance.

How Easy is it to Remove the Band?

- Wristband is like the hospital ID band. Must be cut off. If client continually worries with it or removes it, there are alternatives such as ankle band, heavier nylon band, leather wrist or ankle bands or creativity.

How Does the Caregiver Replace the Battery?

- The caregiver does not replace the battery. The Sheriffs Office maintains a supply of batteries and they must replace batteries monthly.
