Job Summary: Dispatched by Brian Dailey @ 1100 hours this morning. Brian called with authorization from the Incident Commander and Wood County Commissioner Blair Couch. Wood County, West Virginia is contracting SPSI to mobilize its work boat, waterway boom installation equipment, and personnel to deploy boom in the Little Kanawha River below the fire site. Brian also authorized the mobilization of all of SPSI's on hand foam concentrate inventory and fire suppression/foam delivery equipment/appliances to apply that foam concentrate. He indicated that SPSI would not be responsible for fire fighting...just delivery of the foam concentrationm foam application equipment and supporting logistical operations associated with it. He also authorized mobilization and operation of one of our skid steer loader units to move totes and drums of foam concentrate around the fire site. We arrived in staging just before 1600 hours with 2455 gallons foam concentrate and its application/delivery equipment. Our work boat arrived at the Blennerhassett boat ramp in Belpre at 1600 hours, was launched, and had the first 200 foot deployment in place by 1715 hours. Boat crew installed 200 foot boom in another channel associated with the fire property, and a 300 foot boom deployment as a back up to the first two deployments. This was authorized as waterway protection from run-off from increased fire suppression water flow and potential for phased out chemicals to float and migrate. SPSI personnel assisted local fire personnel with deployment of foam delivery equipment, foam logistics, and the site operations ran out of water supply at approximatey 2200 hours this evening. Night operations were reduced due to this situation with limited water supply. Gary Houseman and Dakota Santo volunteered to work through the night as SPSI logistical support to the fire departments as needed. J.Lindley with truck 224 & UTL15 returned to SPSI this evening - back 0100 hours 10/22/17.

Job Summary: G. Houseman & D. Santo worked all night for foam logistics support as needed. D.McCarty & J.Rush did morning waterway boom inspection and water sample collection prior to morning command briefing. Provided operations and logistics support to Incident Command staff. County Commissioner and IC still working towards funding securement to improve resource commitment to this fire situation. Prepared good faith cost estimate at Commissioner's request and presented it to him mid afternoon. He invited, and encourage us, to attend an evening special meeting of the Wood County Commissioner's at 1900 hours. We attended that meeting. We were asked to hold with scaled down crew staffing until tomorrow afternoon at which time the County would be in a position to either authorize our ramped up mobilization of additional resources or to go ahead and demobilize and pay us for work performed. With that down-scale situation, we demobilized DR, WW, and DS for scheduled work tomorrow at an unrelated customer project site. Likewise, DM, BF, and DB demobilized this evening and will return in the morning.

Job Summary: G. Houseman worked all night shift. Mobilized host of resources today following 0930am Commissioner's meeting with State Officials authorizing SPSI resources and guaranteeing payment to SPSI through Wood County. Mobilized excavators, one Screaming Eagle ocilating monitor, large volume high head portable pumps and additional SPSI manpower. Safety briefed incoming SPSI personnel, deployed portable pumps at the river, deployed 4500 feet 5" LDH for water supply to fire site. Used track hoe units with hydraulic thumbs to move fire debris to expose fire and continued fire suppression. Today had heavy rains, wind shifts, and successful establishment of water supply from the river to the fire site. Evening job safety briefing to capture crew experiences from today, get recommendations for tomorrow, and from that discussion with track hoe operators, they identified that steel beams from building structure will require a shear unit to keep productivity moving at a good pace. Bob Full received incident commander authorization to mobilize our shear tomorrow. Night shift tonight will have a primary mission of maintaining water supply from the river to the fire scene using the portable pumps.

Job Summary: GH, JF, NL worked all night shift sustaining river water pumping operations. Mobilized Shear unit for cutting up building structure beams this afternoon. Used track hoe units with hydraulic thumbs to move fire debris to expose fire and continued fire suppression. Governor directed all entities (including SPSI) to ensure adequate resources to handle this situation. Mobilized additional personnel & site safety support resources to help ensure sustained progress in harmony with volunteer fire service resources staffing. Mobilized 3rd portable high-head pump for river water pumping operations in order to relieve Marietta Ohio fire boat & engine at the river. Mobilized a light plant this evening for safety lighting at the river water pumping operation (ICS did not have any extra light plants to offer and told us to handle it). WV State EMA requested Tom Keefer specifically, and we mobilized additional equipment operators and industrial fire personnel from SPSI Southern Division. Night shift maintained water pumping operations from the river, refueled equipment and SPSI field operations support unit, meters, radios, etc.

JOB SUMMARY

Services, Inc.
300 Commercial Drive
Washington, PA 15301
P: 724-228-2700
F: 724-228-2303

	Service Date:	10/25/2017
	Customer :	Wood County, West Virginia
	Project Location:	South Parkersburg, WV
	SPSI Project Number/ICO Job Number:	0949-HME
	Pad Name/Container #/Tank/Rail Car #:	Nylon Warehouse Fire
Round Trip Miles Traveled:	138 miles one-way	
Physical Site Address:	Staging Area @ 3900 Camden Ave in Parkersburg, WV	
GPS Coordinates:		
Job Summary: GH, JF, NL worked all night shift sustaining river water pumping operations. Used shear and track hoe units with hydraulic thumbs to move fire debris to expose fire and continued fire suppression. ICS staff continued inventory investigation and determined "Rynite" was one of the materials contained within this warehouse and that product contains 20% bromine. A temporary work stoppage was authorized to suspend offensive operations and conduct air monitoring for bromine and bromide compounds, pH and oxidizer. All samples collected were non-detectable readings. Night shift maintained water pumping operations from the river, refueled equipment and SPSI field operations support unit, meters, radios, etc.

Job Summary: GH, JF, NL worked all night shift sustaining river water pumping operations. Used shear and track hoe units with hydraulic thumbs to move fire debris to expose fire and continued fire suppression. Night shift this evening operated fire suppression with no fire department support other than one relay pumper on one 5" supply line from the river pumps. We re-positioned all SPSI portable water delivery nozzles around the perimeter of the property to continue fire suppression using un-manned monitors and made adjustments to them throughout the night to target hot spots.

Job Summary: GH, JF, NL worked all night shift sustaining river water pumping operations. Used shear and track hoe units with hydraulic thumbs to move fire debris to expose fire and continued fire suppression. Night shift this evening operated fire suppression with no fire department support other than one relay pumper on one 5" supply line from the river pumps. We continued to re-positioned all SPSI portable water delivery nozzles around the perimeter of the property as necessary to continue fire suppression using un-manned monitors and made adjustments to them throughout the night to target hot spots. USEPA fly-over today with thermal imaging mounted to aircraft was very helpful in identifying hot spots in footprint of building. Incident commander considered this fire "under control" by the end of this day shift today.

JOB SUMMARY

Services, Inc.
300 Commercial Drive
Washington, PA 15301
P: 724-228-2700
F: 724-228-2303

	Service Date:	10/28/2017
	Customer :	Wood County, West Virginia
	Project Location:	South Parkersburg, WV
	SPSI Project Number/ICO Job Number:	0949-HME
	Pad Name/Container #/Tank/Rail Car #:	Nylon Warehouse Fire
Round Trip Miles Traveled:	138 miles one-way	
Physical Site Address:	Staging Area @ 3900 Camden Ave in Parkersburg, WV	
GPS Coordinates:		
Job Summary: Night shift worked all night shift sustaining river water pumping operations. Used shear and track hoe units with hydraulic thumbs to move fire debris to expose fire and continued fire suppression. Night shift this evening operated fire suppression with no fire department support other than one relay pumper on one 5" supply line from the river pumps. We continued to re-positioned all SPSI portable water delivery nozzles around the perimeter of the property as necessary to continue fire suppression using un-manned monitors and made adjustments to them throughout the night to target hot spots. Started fire extinguishemnt on the silo fire at the request of Fire Incident Command. 85% completed. Full extiunguishemnt of the silo will occur during the next daylight work period 10/29/17

Job Summary: Night shift worked all night shift sustaining river water pumping operations. Used a track hoe unit to suppress a few hot spots identified today during fire watch activities. Continued fire extinguishment on the silo fire at the request of Fire Incident Command. Incident Commander deemed "Fire Watch" start time at 1200 noon yesterday, and today we dealt with five small re-kindles fires. Monitored the scene for re-kindles the remainder of the day and overnight shift. Meetings today with responsible party owner and council (once in the morning at their local office, and once again during the late afternoon for a site walking meeting). No direction has been given to SPSI beyond tomorrow noon fire watch timing plus wrap up and decon work authorized by Wood County officials. As of the end of the evening today, we are planning to wrap up and initiate demobilization tomorrow unless commercial terms and conditions and funding is authorized by noon tomorrow.

300 Commercial Drive
Washington, PA 15301
P: 724-228-2700
F: 724-228-2303

Service Date: 10/31/2017	
Customer : Wood County, West Virginia	
Project Location: South Parkersburg, WV	
SPSI Project Number/ICO Job Number: 0949-HME	
Pad Name/Container #/Tank/Rail Car #: Nylon Warehouse Fire	
Round Trip Miles Traveled:	138 miles one-way
Physical Site Address:	Staging Area @ 3900 Camden Ave in Parkersburg, WV
GPS Coordinates:	
Job Summary: Night shift maintained water flow into silo fire; monitored site for re-kindles; fueled equipment; moved fire department light plants and hoses to staging area for them to pick up. Day shift continued fire watch; found a couple more small hot spots and took care of them; initiated demobilization today and ramped up demobilization efforts after 1:00pm fire chief confirmation that he has declared "fire out" and authorized SPSI to wrap up and demobilize. Today we achieved the gross wrap up of fire suppression and water movement equipment to our staging area on site. Tonight the night shift will be down-sized by two men, and two of the three remaining night shift guys will demobilize rental pumps through the night while one guy maintains safety watch over all equipment in staging area. Tomorrow morning, half of day crew will return to SPSI to start decon of fire equipment and water hoses while the other half of crew removes booms and anchors from the river tomorrow.

Job Summary: Night shift last night was down-sized less two men, and two of the three remaining night shift guys demobilized rental pumps and some of SPSI foam inventory back to SPSI through the night while one guy maintained safety watch over all equipment in staging area. This morning, half of day crew returned to SPSI to start decon of fire equipment and water supply hoses while the other half of crew removed booms and anchors from the river. All fire equipment and river booms, etc were back at SPSI by 1500 hours, and by the end of this work period, all river booms were cleaned and approximately 1/3 of the fire hoses were cleaned. A crew for fire hose cleaning is scheduled to resume that operation at SPSI in the morning.

Job Summary: All river booms were inspected and re-loaded onto ERT6. The work boat and its trailer was decon'd and 200' boom reloaded onto its deck. Balance of all fire hose, nozzles, and fittings were cleaned and stretched on floor of building 5 to dry before their third party inspection and hydrotesting service which is scheduled for Sunday. That vendor will repack hoses on that ER unit after their hydrotest service is complete. Other than Sunday's hose testing & repacking service by third party vendor, today concluded our wrap & decon activities from this project.
